

SARAH ADEWALE

Software Engineer

SUMMARY

I'm a creative and detail-oriented Software Engineer with 4+ years of experience in product development, website design, user interface & experience design and technical writing. I have a proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Remote

October 2021 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full-stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Gidigan (Full Stack Angular App) – Gidigan offers a wide range of services that cater to absolutely anyone with something to sell. Their pocket-friendly pricing plans and certified product quality ensure that they are way ahead of the game as far as deliverables are concerned.

Venddir (Full Stack Web App) – Venddir is an online directory for vendors. As with any directory, its core function is listing - alphabetically or thematically with details such as names, addresses, and phone numbers, - all vendors who have opted to showcase their business information on the platform.

Other Projects: [CineVerse](#), [EventLink](#), [Pawsome Haven](#), [Hello-Kene](#), [Venddir Hub](#).

Fullstack Website Developer & SEO Specialist at ColorMe

January 2019 — 2022
